Area of Rectangles and Squares

Find the area of the shapes on these cm^2 grids. (a) (b) (c) (d)

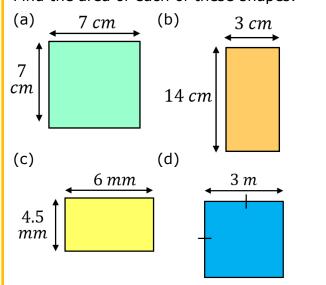

Area of Rectangles and Squares

Find the area of each of these shapes.

Find the area of each of these shapes.

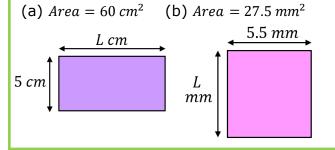

Given the area, find the missing length.

(a)
$$Area = 60 \text{ cm}^2$$
 (b) $Area = 27.5 \text{ mm}^2$

$$5 \text{ cm}$$

Given the area, find the missing length.

A rectangle has an area of $42 cm^2$. Find as many possible pairs of lengths and widths as you can.

A rectangle has an area of $42\ cm^2$. Find as many possible pairs of lengths and widths as you can.
